

THE POLYUNSATURATED PARTY

"We take it greasy"

CAMPAIGN POLICIES

Men and women of Burton and Garran Hall, we firmly believe in style and substance as the basis for a concerted campaign of reconciliation and reconstruction in the coming 80s. In response to those mounting challenges our policies stand as a beacon amongst the ever-growing piles of fatty bacon and dried squid paste. Now is the time to set aside our kitchen knives and frozen fish fingers to unite in a common cause for B.A.G.M.A.

1. There will be no dams for Burton and Garran Halls. Being a party for the people we have taken the results of the latest Krabs/Kelly Gallup Poll as being truly representative of the halls' desire to maintain the Buttery as a Wilderness area of National University importance. The accuracy of the poll was brought out by the increased level of activity in this area since the beginning of the 1983 academic year.
2. The increasing of the budget deficit to \$9.6 billion, besides being a personal issue for our treasurer, "Fat Boy" Long, is of fundamental importance to our platform in order to reduce unemployment in B&G, a programme which will be implemented by the building of an international airport on Barry Drive.
3. In the past, the poorer members of Hall have not been able to survive the harsh Canberra winters without the loss of one extremity or another. Under the "Freedom of Choice" policy, which will be an innovation of the "Party", any student, after examination by the association, being deemed to have suffered from frostbite will be given a free sock and in accordance with our policy will be allowed to do whatever he or she wishes with that sock so long as this action does not impinge on the "inalienable rights" of any other member (of Hall).
4. The kitchen areas of Burton and Garran have been the centre of a raging controversy in the weeks leading up to this election, with the "other party" refusing to agree that kitchens 5 through 30 should be used as "safe" areas for the radioactive waste produced by Bull Krabs' blow dryer. The Polyunsaturates stand firm on this issue and will not allow dumping to go ahead. We believe it would be much safer to use the heat generated by the deteriorating waste for our hot water.

5. In an effort to save on the power bill for 1983 all the kitchen Insecto-
cutors will be turned off. In order to maintain hygiene standards, which
could be seen by some of the more subversive elements in our community to be
suffering under this policy we have adopted "The Solution". For each member
who produces 100 flies (or suitable anatomy thereof, i.e. head, wings etc.)
there will be an award of an autographed picture of Colin Higby at the trough
during his frequent meal breaks.

So on Tuesday between 6pm and 9pm, vote the POLYUNSATURATED PARTY for
PEACE, POWER, PEOPLE
AND A GOOD TIME FOR ALL.
